## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 20, 2005 has been entered.

### **New Rejection**

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 8-12, and 38-42 are rejected under 35 U.S.C. 102(e) as being anticipated by Tanner et al. US 2003/0119043 A1 (Effective filing date=November 9, 2001; cited in FINAL office action).

Tanner et al. disclose a polypeptide sequence that has 100% identity to the currently claimed polypeptide identified as SEQ ID NO: 6 (see US 2003/0119043 A1, pg. 28, SEQ ID NO: 18). A disclosed structural polypeptide will inherently dictate a function upon the disclosed polypeptide. Therefore, the peptide that has 100% identity would be expected to possess the function currently being claimed (current application, claims 8-12, and 38-42).
